Harmonic Serialism: Postcards from the Edge
John J. McCarthy
University of Massachusetts Amherst

This short course will introduce Harmonic Serialism and describe some results from the latest research in this area. Topics will be drawn from:

- Autosegmental spreading (McCarthy 2008a, 2009).
- Computational implementation (Becker et al. 2009).
- Connections with Harmonic Grammar (Pater 2009, 2010).
- Iterative stress assignment (Pruitt 2008).
- Local optionality (Kimper to appear).
- Opacity (Elfner 2009).
- Phonetics-phonology interface.
- Positional faithfulness (Jesney 2009).
- Reduction and deletion processes (McCarthy 2008b, 2008c).
- Reduplication.

Suggestions for topics to prioritize can be sent to John in advance (jmccarthy(at-symbol)linguist.umass.edu).
